

**REDUCE
REUSE
RECYCLE**

www.techno-win-machine.com

**IF YOU REALLY THINK
THE ENVIRONMENT IS
LESS IMPORTANT THAN
THE ECONOMY, TRY
HOLDING YOUR BREATH
WHILE YOU COUNT
YOUR MONEY**

**WE DON'T SAVE THE
ENVIRONMENT FOR TOURISM,
BUT FOR US!**

Short-term economic gains without considering the impact on the environment are harmful to the overall quality of life and leave long-term consequences.

Will we forever be an example of clean sea and blue? Let's think about time, let's not let Pharos be Otpados, forever HvarEko!

**A SUSTAINABLE LIFESTYLE IS
MY WAY, NOT FASHION!**

A sustainable way of life is not dumping waste in containers. Sustainable living is about preventing disposal from happening in the first place.

Let's educate ourselves on how to achieve this, and learn how to properly implement what is necessary to postpone.

I follow the steps of consciousness and when buying I ask myself if I really need it!

If I have to buy, I put it in my cloth bag that I carry with me!

I buy seasonally and from my area - food, ecological cleaning products and long-lasting things - clothes and shoes.

If the product is in some packaging or packaging after consumption, I wash it, flatten it and put it away!

TAKES AWAY - ON SATURDAYS

PAPER

"How many more of us will you cut down for not separating waste? You throw away so much cardboard and paper every day, and you can use it multiple times. Make yourself and others aware of unnecessary hoarding!" - a pine tells us!

TAKES AWAY - ON WEDNESDAYS

PLASTIC

"Please don't throw me to float in the sea, throw me in the yellow tank, that's where my plastic company is. Crumple me up to fit us as much as possible, because that's how we have the best fun." - a plastic bottle tells us!

Paper packaging
Clean and dry YES
Greasy and dirty NO

Plastic packaging
Clean and harmless
YES Unclean and
dangerous NO

Mixed waste is collected on Mondays and Thursdays in Hvar, and on Tuesdays and Fridays in suburban settlements. In suburban settlements, paper and plastic are collected on Tuesdays and Fridays.

BIO WASTE

We get new vegetables from the vegetables that we throw in biowaste through compost, which we feed the seeds and seedlings. Do the best you can for yourself, you have a known origin of food, which is rare and appreciated nowadays.

THANK YOU

on attention, action and reaction!

What we do to the planet,
we do to ourselves!
